What I built in 9 days

March 10-19, 2026 — solo, with AI tools

Hotel Data Pipeline

2,069 HotellerieSuisse rows → 718 selected → 272 ICP hotels

Day 1

Synthetic Buyer Survey

1,632 AI buyer interviews, $25.54 total cost

Day 3-4

Monte Carlo Model

10,000 simulations, two scenarios, P10/P50/P90

Day 5

Business Plan

Competitive landscape, tax structure, GTM strategy

Day 6-9

The Swiss Market

2,069 HotellerieSuisse member rows

718 Selected dossiers (enriched + scraped)

272 ICP hotels (4-5★, ADR ≥ CHF 250)

Geographic clusters: Zermatt (54) · Zurich (48) · Geneva (32) · Basel (21) · Lucerne (18) · St. Moritz (13)

What 272 Hotels Told Us

Synthetic buyer survey · 1,632 simulations · 2 roles × 3 replications · adversarial + judge pass

37%

Buy likelihood

Deal killer:
No PMS integration

What hotels need to buy

1	PMS / CRM integration	1,089
2	Swiss reference customer	752
3	60-day pilot option	642
4	GDPR / Swiss hosting	636

Top 10 Target Hotels

#	Hotel	Location	Stars	Rooms	ADR CHF	Buy@3K
1	Schweizerhof Zürich	Zürich	5★	95	784	51%
2	Suvretta House	St. Moritz	5★	176	780	50%
3	Victoria-Jungfrau	Interlaken	5★	216	725	48%
4	Bellevue Palace	Bern	5★	126	434	46%
5	Schweizerhof Bern	Bern	5★	99	434	47%
6	AlpenGold Davos	Davos	5★	216	348	47%
7	Beau-Rivage Palace	Lausanne	5★	168	661	48%
8	Les Trois Rois	Basel	5★	82	510	48%
9	Métropole Genève	Genève	5★	102	621	47%
10	Schweizerhof Luzern	Luzern	5★	101	388	45%

Ranked by composite priority score from synthetic buyer survey. Full outreach angles available for each hotel.

Business Model Canvas

Key Partners

Amedeo & Corsaro network
PMS providers (Mews, Oracle)
HotellerieSuisse
LLM providers (OpenAI, Anthropic)

Value Proposition

Full commercial intelligence team in a platform. Hotel's story told through guest eyes, in every language, updated weekly.

Customer Segments

Swiss 4-5★ premium hotels (ADR ≥ CHF 250)
272 ICP properties
Expand: DACH, France, Nordics

Key Activities

AI platform development
Hotel onboarding & customization
Data pipeline maintenance
Content engine iteration

Channels

Warm intros (founder network)
Industry events (HotellerieSuisse)
Case study content marketing
Partner referrals

Customer Relationships

White-glove onboarding
Weekly action plans
Quarterly business reviews
Dedicated CSM at scale

Cost Structure

LLM tokens: EUR 15-50/hotel/mo · Hosting: EUR 200-500/mo
Founder salary: CHF 4K/mo (scaling with milestones)
First hire at ~15 hotels / CHF 30K MRR

Revenue Streams

SaaS subscription: EUR 1,000-5,000/mo per hotel
Tier 1 (Proof-of-Value): EUR 1,000-1,500
Tier 2 (Intelligence): EUR 1,500-2,500
Tier 3 (Full Platform): EUR 3,000-5,000

Unit Economics

>95%

Gross Margin

COGS EUR 15-50/hotel/mo

5-6

Hotels to Breakeven

At avg EUR 2K/mo ARPU

~CHF 135K

Seed Capital Needed

Covers runway to breakeven

Why margins are this high

AI-native architecture means near-zero marginal cost per hotel. No human content production. No per-hotel customization labor after onboarding. The intelligence layer runs on LLM APIs (modeled at current OpenAI/Anthropic pricing). Infrastructure costs are shared across the customer base. Every new hotel improves the benchmark data for all hotels.

Financial Projections

Monte Carlo simulation · 10,000 runs · P50 (median) values shown

Operator-Seeded Scenario (P50)

	Month 12	Month 18	Month 36	Month 60
Hotels (total)	23	35	75	134
ARR (EUR)	612K	989K	2.41M	5.00M
MRR (EUR)	51K	82K	201K	417K

Operator + Follow-On Angel Scenario (P50)

	Month 12	Month 18	Month 36	Month 60
Hotels (total)	26	41	95	181
ARR (EUR)	683K	1.16M	3.10M	6.91M
Exit value (EUR)	—	—	—	35.2M

Conservative exit multiples: 3.9-6.0x trailing ARR (operator) · 4.0-6.2x (angel). Validated against vertical SaaS comparable exits.

How I'd Run It

AI-native from day 0

No investment cap on tokens and models. Agentic workflows for everything. The synthetic survey IS the product methodology — I ate our own dog food for $25.54.

Revenue drives hiring

I evaluate existing product context in week 1. Solo founder/operator until revenue or bottlenecks justify hires. First external hire at ~15 hotels / CHF 30K MRR.

Daily iteration

I don't do weekly sprints. I ship and fix in hours. Everything you're seeing was built in 9 days. That's how I operate every day.

Clients over capital

10 paying hotels teach us more than any funding round. Marketing budget Year 1: near zero. Your network is the entire go-to-market engine.

What I Need

1

10 Warm Introductions

I've ranked the top 50 Swiss hotels by buy likelihood. I know who to call and what to say. I need you to open the door to hotel GMs in the first 6 months. This is the single most valuable thing you can contribute.

2

Seed Capital: CHF 120-150K

Capital-light business. >95% gross margins mean self-funding after ~5-6 hotels. This covers founder salary, infrastructure, and runway to breakeven. No VC needed.

3

Structure & Alignment

Swiss AG in Zug (11.8% corporate tax). Marco = CEO/Administrator. Equity: contribution-based, milestone-growing. Salary: CHF 4K/mo scaling with hotel milestones + 2% MRR revenue share.

Next Steps

Week 1

Evaluate existing MVP and team context

Understand what's built, what's needed, and how to accelerate

Week 2

First pilot hotel onboarding

Live deployment with the chain Amedeo has in pipeline

Week 3-4

Feedback loop and iterate

Daily shipping cycle with real hotel feedback

Month 2

Second batch of introductions

Leverage first hotel proof to open next 5 doors

Io sono pronto. Ci sono.
